SEARCH BEFORE YOU STOCK

Before you stock any tobacco products, make sure you know which products are legal to sell under federal law.

Use FDA's Searchable Tobacco Products Database to check products before you buy.

FDA's Searchable Tobacco Products Database lists over 17,000 tobacco products—including cigarettes, cigars, cigar wrappers, e-cigarettes and nicotine pouches—that may be legally marketed in the United States.

Retailers may receive fines for selling tobacco products not listed in the database.

Before you decide which tobacco products to offer for sale in your store, check the FDA database.
